

# Individual reports – on demand

## Measuring - Reducing - Offsetting

### Post carbon impact in comparison to regional emissions for 2012

# UPU Green «Track and Trace»

Recommendations for reducing emissions

- Quantitative and qualitative analysis
- Emissions reduction
- Costs reduction
- Social bonus

## Measuring - Reducing - Offsetting

# Offsetting

Measuring and reducing: necessary steps before benefiting from offsetting incentives and supports

2014: official creation of the first sectorial offsetting mechanism

[www.postalcarbonfund.com](http://www.postalcarbonfund.com)

## Measuring - Reducing - Offsetting

The postal sector, an actor in the fight against climate change

## UPU Context

A clear mandate: measurement, reduction and promotion of offsetting mechanisms

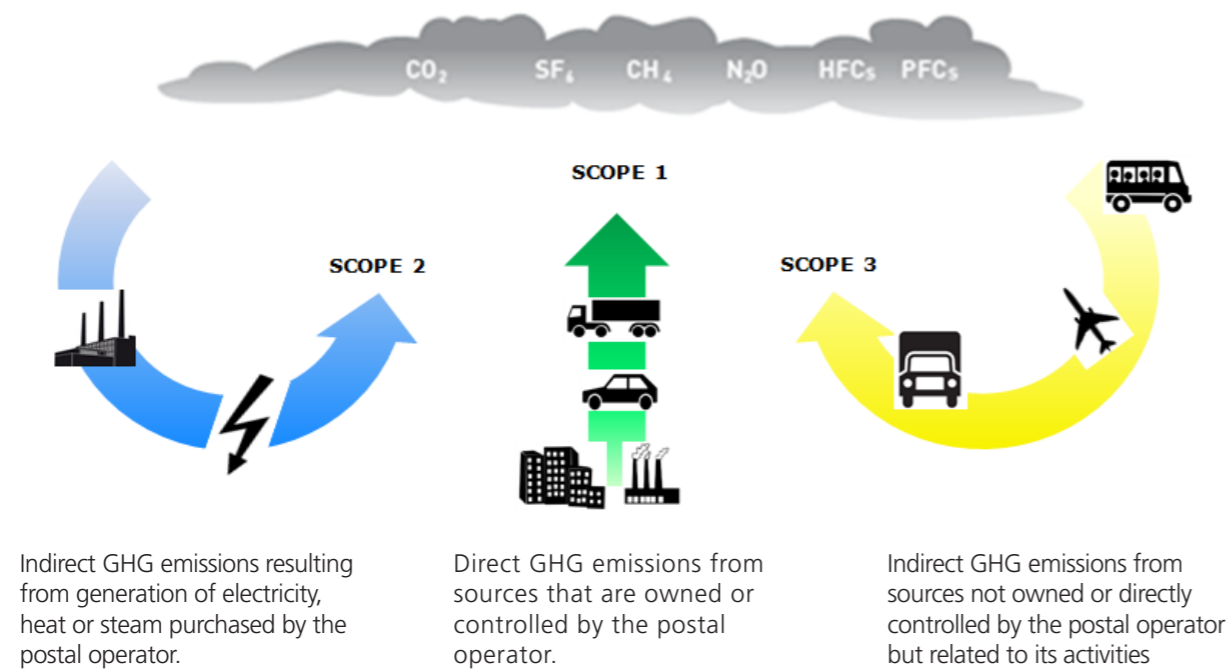

- 2009 : launch of the UPU GHG measurement and reporting programme
- 2012 Doha Congress: Resolutions C66/2012 and C76/2012

Direct and indirect benefits of GHG calculation and reporting

- Costs reduction
- Improved communication with stakeholders
- Meeting customers' expectations
- Managing and anticipating climate and environmental legislation
- Integration into strategies at country level

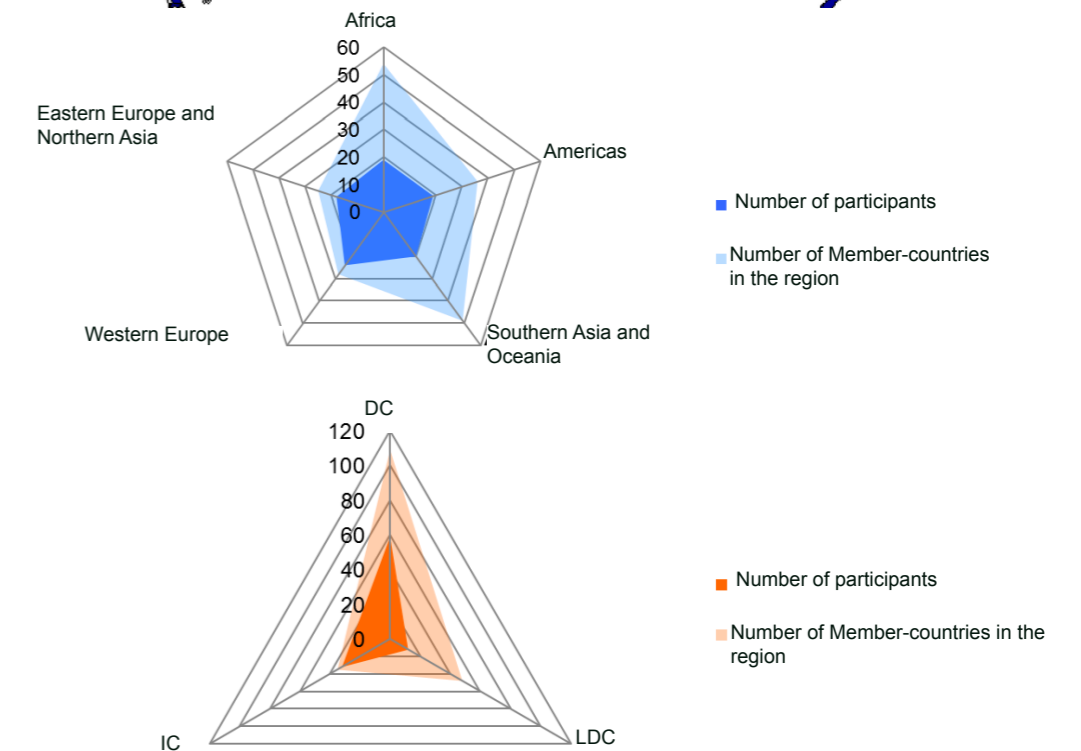

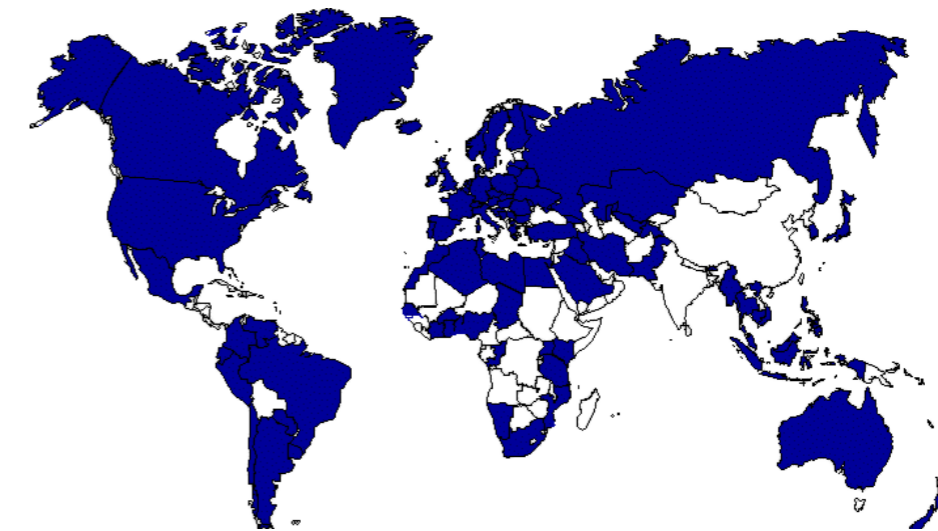

## Scope of reporting

Measuring - Reducing - Offsetting

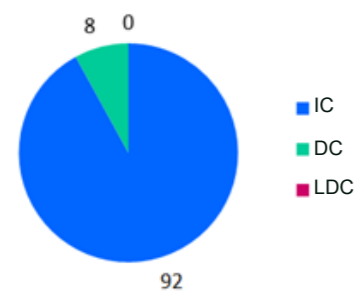

## Participation

Measuring - Reducing - Offsetting

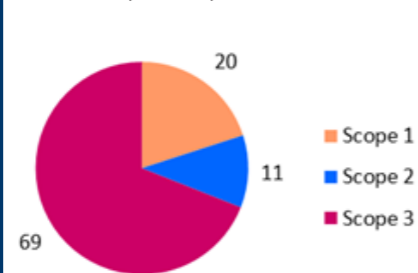

## Approximately 62 million tonnes CO<sub>2</sub>eq emitted in 2013

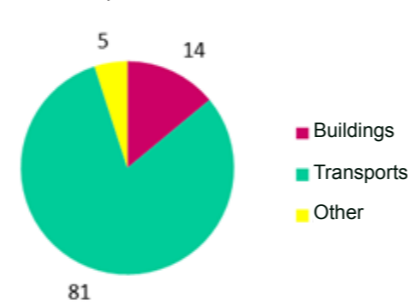

Emissions according to the level of development (%)

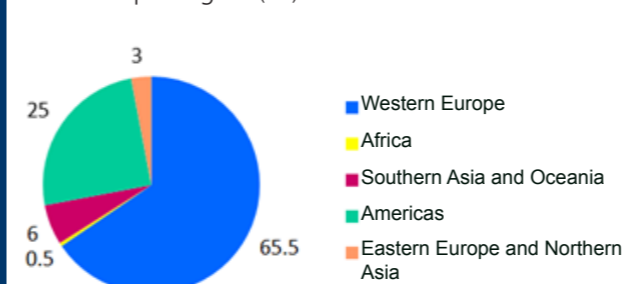

Emissions per scope (%)

Emissions per source (%)

Emissions per region (%)

### INTO PERSPECTIVE
