

# Serbia

## Postcode

### Postcode type and position

6 digits to the right of the term PAK and below the number and the delivery post office name

### PAK Coding method

4 5 6 7 6 9

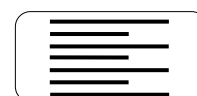

## Position of the address on the envelope

Bottom right-hand corner

## Alignment of address lines

Left aligned

## Address format

Post Serbia has a six-digit postcode -“postal address code” (PAK) which goes down to the street level. To address a mail item properly to Serbia, the PAK shall be included in the address below the number and the name of the delivery post office.

For items that are addressed to P.O box, "poste restante" or for military address, the PAK is not needed in the address.

For rural address with no official street name assigned, a blank line is left between the addressee and locality details.

## Examples

### Home delivery

#### Urban addresses
