Ireland (Department of Communications, Marine and Natural Resources)	No. Ireland will not accept mail dispatches from an extraterritorial office of exchange (ETOE) unless an agreement exists between it and the administration operating the ETOE outlining the terminal dues rates applicable for this flow.	While there is no specific legislation governing the establishment of ETOEs, Statutory Instrument SI No 616 of 2002 "European Communities (Postal Services) Regulations 2002" provides for Postal Service Authorizations. This legally requires a postal service provider with an annual turnover of more than 500,000 EUR to apply to the Postal Regulator for an authorization to provide a postal service in Ireland. The granting of an authorization is subject to a number of conditions, including quality of service, and to an undertaking not to infringe on the area reserved for the universal service provider.	Yes	According to resolution C 44/2004, the agreement of any UPU member country must be obtained, in accordance with its national legislations, by any other countries or operators seeking to establish ETOEs within that country. <p>Portugal (ANACOM – Autoridade Nacional de Comunicações)</p>	<p>No, because the UPU Acts apply only to the universal postal service provider designated by the Portuguese State. In this connection, the universal postal service provider agrees to deliver items received from an ETOE on the basis of a commercial contract providing for the presentation and remuneration of this mail under the same conditions as for other domestic customers. The contractual, operational and financial association requires documentation and specific procedures provided by the universal service provider which do not fall within the scope of the UPU.</p>	<p>No, because ETOEs – being of a commercial nature – are governed by the licensing system in force and service providers other than the universal service provider. <p>United States of America (IO/T Bureau of International Organization Affairs US Department of State)</p>	<p>No In late 2001, the United States of America adopted a policy in respect of the acceptance of inbound items tendered by ETOEs located in other countries. In accordance with this policy, ETOEs should be treated in the same manner as other private companies with which they compete, and ETOE items destined for the United States of America cannot be accepted by the USPS on the basis of UPU documentation and for compensation at UPU terminal dues rates. The USPS will deliver inbound items from an ETOE under domestic rates, terms and conditions, and upon payment of domestic postage rates. The USA issued UPU Circular 127 dated 11 April 2005, which advised that, effective 1 May 2005, USPS offices of exchange will refuse to accept dispatches of ETOEs on the basis of UPU documentation. Airlines, ground handling and transportation companies have been advised separately that the USPS will not accept ETOE dispatches at inward offices of exchange</p>	<p>There is no legislation specifically addressing ETOEs. In accordance with US policy, ETOEs are strictly commercial entities that should not be able to access postal networks under the terms of the UPU Acts since they are not treaty-based services fulfilling a country's obligations under the UPU Acts. Currently, US policy neither explicitly authorizes nor prohibits the establishment of ETOEs in the USA. ETOEs that operate in the USA should, however, operate under the same terms as any other commercial operator and should provide the appropriate information as requested in 2.2</p>	<p>It is the policy of the United States Government that the UPU Acts do not apply to ETOE commercial operations in the USA, and that, accordingly, ETOEs are not authorized to use UPU documentation. According to this policy, an entity other than the USPS should not export mail matter from the USA to other countries using UPU documentation or USPS equipment or customs forms</p>	<p>Existing ETOE operators and those public or private operators that intend to establish ETOE operations in the USA are expected to provide the full name of the operator, street address, telephone, fax and e-mail of the person or persons responsible for the ETOE operations in the USA to the following contacts: 1 U.S. Department of State Mr. Dennis Delehanty Director for Postal Affairs Office of Technical Specialized Agencies (IO/T) Bureau of International Organization Affairs Room 5333 U.S. Department of State WASHINGTON DC 20520-6319, USA Tel: (+1 202) 647-4197 Fax: (+1 202) 647-8902 E-mail:delehantydm@state.gov 2 United States Postal Service Mr. Bruce Marsh USPS International Postal Affairs 1735 N. Finland

Conditions of the postal administration of Finland for accepting ETOE mail in accordance with the UPU Acts

Generally, mail exchanges in accordance with the UPU Acts are based on reciprocity. This does not exist for ETOE mail, and other operators or third parties cannot be discriminated against.

1 Postage and dispatch insignia

All insignia must show which postal operator runs the ETOE, and the latter's name and location. This information is needed to determine who pays the terminal dues, and to deal with possible returns.

2 Terminal dues

The postal administration of Finland will charge the same terminal dues it would have charged if the mail had been sent by the postal administration (public postal operator) of the country in which the ETOE is located.

Terminal dues for mail from all "old" EU countries will be determined in accordance with the REIMS Agreement, and those for mail from the "new accession" EU countries in accordance with REIMS East – where the latter exists. Otherwise, REIMS will also be used for the "new accession" countries.

3 Returns

The postal administration of Finland does not make ETOE dispatches. In order to serve customers (i.e. the sender), mail should be returned to the country where the sender resides.

The free return of mail is based on reciprocity, which in this case does not exist. Therefore, the postal administration of Finland will charge normal tariffs for returned mail.

4 Dispatches, format separation and dispatch lists

The traffic composition, frequency and other variables will, in all probability, differ from the "normal" traffic from the country in which the ETOE is located and from that of the postal administration operating the ETOE.

Consequently, for ETOE mail, the postal administration of Finland cannot use fixed IPKs or statistics and sampled IPKs that apply to other traffic flows. For the above reasons, it is neither feasible nor cost-effective to carry out sampling on ETOE mail to the required extent.

Therefore, mail from ETOEs to Finland has to be formatted separately, into P, G and E formats (for checking purposes). Each dispatch should have a dispatch list for each format type, including the number and weight of the items. (Most ETOE mail is from medium-sized and large customers, and is computer generated and mainly from mailing houses.)

5 Items posted abroad i.e. ABA and ABC mail

Mail items from ETOEs to Finland have to originate from a sender in the country where the ETOE is located. If that is not the case, the postal administration will in all cases charge for ABA and ABC mail the terminal dues set out in article 43 of the Beijing Convention and, once the Bucharest Acts have entered into force, those set out in the corresponding article of the Convention. (This also concerns mail from all EU countries.)

6 Quality of service link

Once a technical solution has been found for QOS monitoring of ETOE mail, the postal administration of Finland requires ETOE mail to be part of the QOS-link system.

ETOE mail from all EU countries has to fulfil the EU Postal Directive and the European Commission Decision on Third-Party Access. Therefore, ETOEs located in the European Union have to take part in the prevailing EU measurement scheme, which is currently UNEX (run by IPC).

Poland

In the Polish legal system, there are no direct regulations concerning ETOEs.

Economic regulations permit foreign entrepreneurs to establish branch offices in Poland. In accordance with Art. 85 of the Act of 2 July 2004 on Freedom of Economic Activity (Dz.U. Nr 173, poz. 1807), foreign entrepreneurs may establish branch offices with their registered office within the territory of the Republic of Poland in order to conduct economic activities with Poland. Foreign entrepreneurs establishing a new branch office may conduct economic activities only within the defined scope of business for foreign entrepreneurs (Art. 86 of the Act on Freedom of Economic Activity). In accordance with Art. 88 of the Act on Freedom of Economic Activity, foreign entrepreneurs may launch economic activities in a branch office only after registering the branch office with the Register of Entrepreneurs. The rules governing the recording of entries in the Register of Entrepreneurs are the subject of the provisions of the Act of 20 August 1997 on the National Court Register (Dz.U. Nr 17/2001, poz. 209, with subsequent amendments).

The conduct of postal activities is subject to additional requirements, namely an authorization or entry on the Register of Postal Operators, regulated by the Postal Law of 12 June 2003 (Dz.U. Nr 130, poz. 1188, with subsequent amendments). Postal activities cannot be provided in the area reserved for the State Enterprise "Poczta Polska" (defined in Art. 47 of the Postal Law).

Venezuela

In accordance with the provisions of the preamble to the UPU Constitution, the Venezuelan Constitution indicates that the standards adopted within the framework of integration agreements at international level will be deemed an integral part of the legal system in force, and will thus directly and preferentially apply in domestic legislation.

In this connection, the postal law in force expressly indicates that mail – as a public service – will be governed by the provisions of national legislation and the provisions of the postal conventions, agreements and treaties ratified by Venezuela.

In light of the above, provision of the Venezuelan postal service at international level is subject to the provisions of the international treaties signed and ratified by Venezuela, without however conflicting with the application of standards and procedures which differ from those prescribed in the UPU Acts.

Consequently, operational, remuneration and accounting procedures, as well as the use of forms relating to postal exchanges via ETOEs, should be adapted to the practices internationally accepted and set out in the UPU Acts.
