

Argentina

Postcode

Postcode type and position

8 alphanumeric characters (1 letter, 4 digits and 3 letters) to the left of the locality name.

Coding method

Y 5 9 0 0 F N F

→ province
→ locality
→ block

Address format

Argentine Post recommendations:

- each line should contain a maximum of 40 characters;
- the following symbols should be avoided: full stop (.), dash (-), accents (´, ¨), (º) and parentheses (,);
- in general, it is not necessary to indicate the type of thoroughfare if it is a street (CALLE); other types of thoroughfare must be specified;
- the thoroughfare type (CALLE) is obligatory where the thoroughfare name is a number or letter (e.g. CALLE 7, CALLE A);
- where the thoroughfare name ends in a number, the abbreviation No should be used to separate the number in the name of the street from the street number (e.g. 17 DE OCTUBRE DE 1945 No 1340);
- fonts with letters between 3 and 7 mm high and no more than 7 mm wide are recommended; the preferred fonts are Courier 12 or 15 and Helvetica 12 or 15.

Examples
