

Brunei Darussalam

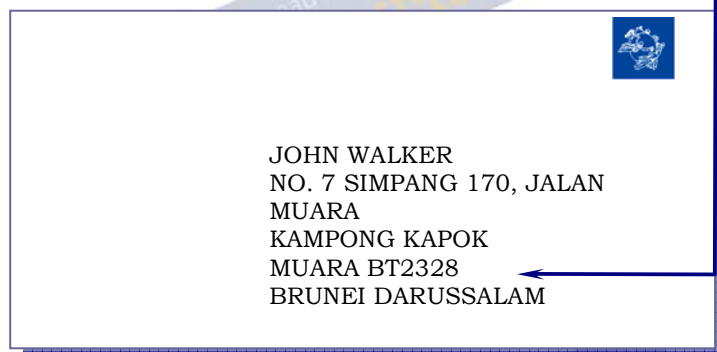

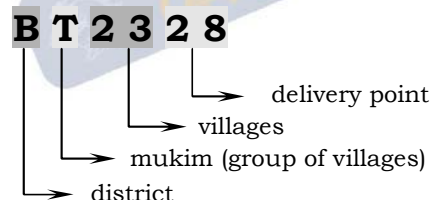

Postcode

Postcode type and position

6 alphanumeric characters (2 letters, 4 digits) to the right of the district or town name.

Coding method

B T 2 3 2 8

Address formats

The correct address structure is as follows:

- Line 1 Addressee or company name
- Line 2 Street number, floor, building name, junction number, name of street and main street
- Line 3 Name of village
- Line 4 Name of town or district + postcode
- Line 5 Name of country

The postcode is always preceded by the district name, except in the case of Bandar Seri Begawan, where the postcode is preceded by the town name.
