

Bahrain (Kingdom)

Postcode

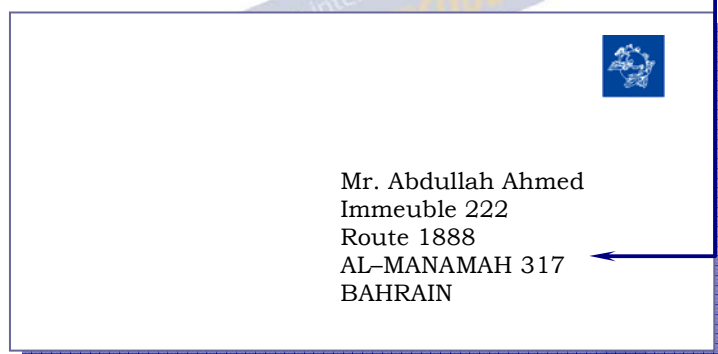

Postcode type and position

3 or 4 digits to the right of the locality name.

Coding method

3 1 7

→ Region or municipality

Address format

In four-digit postcodes, the first two digits identify the region. Valid postcodes range from 1XX to 12XX.

The order of the lines is as follows:

1. addressee's name;
2. number of house, building, shop or any other establishment;
3. street name and number;
4. name of town, rural locality, followed by residential complex number;
5. name of State.
