Commentary
15.2.1.1 The list of narcotics and psychotropic substances placed under international control (abbreviated list) is given in part III of the List of Prohibited Articles.

In an inquiry conducted by the IB among adms on smuggling narcotics and psychotropic substances by post, a number of difficulties emerged, particularly as regards the attitude to be adopted by the intermediate country having regard to the freedom of transit when closed mails are suspected of containing such arts. Congress adopted in this connection formal opinion C 54/Washington 1989, the operative part of which is given below:

"Congress invites postal administrations:

i – to cooperate in combating the traffic in narcotics and psychotropic substances whenever they are legally required to do so by their national authorities responsible for this matter;

ii – to ensure respect for the fundamental principles of the international Post, in particular, the freedom of transit (art 1 of the Constitution and of the Convention);

iii to make all appropriate arrangements with the relevant authorities of their countries to ensure that bags of mail in transit suspected of enclosing items containing narcotics or psychotropic substances are not opened, but to advise:

a by the quickest means, at the request of their customs authorities the administration of destination so that the suspected bags can easily be identified on arrival;

b by verification note, the administration of origin of the mail;

c to approach the legislative authorities, in consultation with the customs services, to ensure that laws and regulations do not prevent the use of the technique known as `controlled delivery’; the Customs of the transit country, if necessary with the agreement of the competent authorities, must take appropriate measures to inform the customs authorities of the country of destination and, possibly, of the country of origin of the suspect mails."

15.2.1.2 It is at the discretion of each adm to decide what is meant by the term “obscene”.

15.2.1.3 Non-admission for conveyance or transit of correspondence items should be notified to the adms so that the public may be informed of the prohibition in good time.

Information about current prohibitions in Union member countries is communicated to the IB, which updates the List of Prohibited Articles on that basis. Each adm must ensure that, wherever possible, the information about current prohibition in its country and sent to the IB is set out in clear, precise and detailed terms and that it is kept up-to-date.

15.3 In addition to explosive or flammable substances, compressed gases, corrosive liquids, oxidizing and toxic substances and any other substances which could endanger human life or cause damage are to be considered dangerous.

The “List of definitions of dangerous goods prohibited from conveyance by post”, drawn up by the International Civil Aviation Organization (ICAO) is given in part IV of the List of Prohibited Articles (pink sheets).

With regard to the safety of staff involved in handling items presumed to be dangerous (mail bombs), Congress issued recommendation C 76/Rio de Janeiro 1979, recommending to adms that they:

*a As preventive measures:

i establish permanent liaison with the competent authorities of their countries (police, customs, national security committees, etc) in order:

– to be informed of any threats or of signs indicating the dispatch of dangerous items;

– to settle questions concerning the examination of items and the destruction of dangerous arts;

ii issue directives for their services based in particular on the information contained in the CCPS study on the measures to be taken to detect mail bombs and to protect staff against the risk of explosion when such items are discovered in the mail;

iii ensure that the examination of items presumed to be dangerous is carried out by the most appropriate methods;

iv have their national legislation adapted or supplemented, if necessary, with a view to authorizing operations enabling mail bombs to be detected;

v in conjunction with the competent authorities, alert the public with as much information as possible, subject to any security restrictions, so that they can take all necessary precautions for their personal safety;

b As soon as dangerous items are reported or their presence presumed:

i give the staff concerned full particulars concerning the external appearance of these items and the need to handle them with particular caution;

ii inform immediately and as fully as possible, by telecommunication, the IB of the UPU and the foreign postal administrations directly threatened."
It also instructed the IB to inform immediately the adms of all member countries of the Union and to send them any information which may be of interest to them.

Congress also passed resolution C 39/Seoul 1994 urging postal adms, with the assistance of the IB, to:

a. strengthen measures aimed at preventing and detecting the insertion of prohibited and dangerous arts in postal items;
b. develop to this end educational measures suited to the local situation, for the benefit of postal customers and staff;
c. ensure wide dissemination of these measures and appropriate training for the staff, using the most effective modern technical methods.

15.6. By “currency notes” are meant notes issued by governmental, regional or municipal authorities as legal tender, as opposed to those issued by banking houses under the control and with the authorization of the government.

Cheques, securities payable to bearer and generally speaking any negotiable instruments which can easily be cashed at a bank shall be considered as “securities payable to bearer”. Papers “representing a monetary value”, such as lottery tickets, postage stamps and transport vouchers, may be enclosed in unregistered priority items and in unregistered sealed letters, while still prohibited in reduced-rate items.

Information about the admission in registered items under sealed cover are given in the Letter Post Compendium.
