

UPU-TechCert

Your gateway to reliable integration

ABOUT UPU-TechCert

UPU-TechCert is a state-of-the-art IT certification service, proudly offered by the Universal Postal Union's (UPU) Postal Technology Centre. It has been developed to streamline the integration of commercial software with UPU software used in as many as 192 countries, through the standard interfaces (APIs) exposed by the UPU. In today's rapidly evolving digital landscape, seamless interoperability is crucial to a modern and truly universal postal network delivering a breadth of e-commerce, logistics, communication, financial and digital services. UPU-TechCert ensures that IT vendors can confidently offer products that work cohesively with the UPU's software, serving the postal industry more efficiently. Users of UPU software can then adopt the certified commercial software with the same confidence.

UPU-TechCert strives to provide coverage for multiple domains within the UPU portfolio of IT solutions, including:

**MAIL AND
LOGISTICS**

**POSTAL
PAYMENTS**

**BIG DATA/BUSINESS
INTELLIGENCE TOOLS**

Contact us today to learn more about UPU-TechCert and get started on your certification journey. UPU-TechCert is your gateway to reliable integration in the postal industry.

WHY CHOOSE UPU-TechCert?

FOR IT VENDORS

As an IT vendor, ensuring your products integrate effortlessly with UPU Software is vital. UPU-TechCert is here to empower your business in several ways:

CERTIFICATION OF INTERFACES

UPU-TechCert meticulously verifies the successful integration of your hardware or software, ensuring compatibility and interoperability. This certification is a clear indicator to potential customers that your products meet rigorous standards.

PROMOTION AND CREDIBILITY

Achieving UPU-TechCert certification allows you to showcase your commitment to quality and compatibility. You can enhance your reputation by incorporating the authorized UPU-TechCert logo into your marketing materials. This logo is an internationally-recognized symbol of trust.

CONTINUITY AND RISK REDUCTION

Integration errors and production risks can be costly. UPU-TechCert offers biennial certification renewals to safeguard the value of your IT products. This not only minimizes risk but also provides continuity, assuring your customers that your products will work seamlessly over time.

CONTINUOUS DEVELOPMENT

With UPU-TechCert, you have the possibility to extend the Certification Domain and Scope of your certified products. This allows your business to adapt and grow with the evolving needs of the postal industry.

STANDARDIZATION

The postal industry has its own unique requirements. UPU-TechCert ensures that your products align with recognized international standards. This standardization is crucial to maintain the compatibility and efficiency of your products within the postal sector.

RELIABILITY

In a competitive marketplace, reliability sets you apart. UPU-TechCert enhances confidence and trust in your vendor products through a rigorous certification process. Your customers will know that they can depend on your solutions.

MARKET EXPANSION

By obtaining certification through UPU-TechCert, IT vendors can demonstrate their compatibility and integration capabilities with UPU software, which is widely used within the postal industry. This opens doors to new business opportunities and gives your brand international recognition.

CERTIFICATION DETAILS

INITIAL CERTIFICATION

This is your first step in demonstrating the seamless integration of your products with UPU software. It's a valuable investment in the growth and credibility of your business.

RE-CERTIFICATION (EVERY TWO YEARS)

The digital landscape evolves rapidly. To maintain your certification, re-certification every two years is essential. This ensures that your products continue to meet the rigorous UPU-TechCert standards and benefit from the evolutions and new features of UPU solutions.

EXPANSION WITHIN THE SAME CERTIFICATION DOMAIN

This allows your business to adapt to the changing needs of the postal sector and grow its portfolio.

EXPANSION TO A DIFFERENT CERTIFICATION DOMAIN

This flexibility allows your business to explore new opportunities within the postal industry.
