International Bureau Circular **91**
Portugal – Introduction of the digital stamp

Dear Sir/Madam,

The designated operator of **PORTUGAL**, CTT Correios de Portugal, S.A., would like to inform other Union member countries and their designated operators of a new form of franking – the digital stamp – which has come into circulation.

On 20 May 2025, mail items began to circulate internationally with this new form of postage for the priority and tracked services in the 20 g and 50 g weight steps, and it is expected that this new service will be extended to more weight steps.

The digital stamp will be printed on self-adhesive thermal paper with a QR code associated with the service logo and the CTT brand, as shown in Annex 1.

Yours faithfully,

Vladyslav Dubenko
Director of Logistics
