

PHILATELY IN FIJI

This exhibit depicts all the stamp releases by Post Fiji Pte Ltd from 2022 to till date

BRIEF HISTORY - FIJI: Fiji is made up of about 332 islands covering some 650,000 square kilometers of ocean. Lying between longitudes 175 and 177 West and latitudes 15 and 22 South, Fiji is centrally placed amongst other South Pacific Island nations. Situated just west of the international dateline, Fiji is literally where each new day begins and the 180th meridian dateline is adjusted so that the entire archipelago falls into the same time zone which is 12 hours ahead of Greenwich Mean Time. Fiji has a warm sub – tropical climate without the undue extreme of temperature and humidity. This country is definitely a pleasant place to visit, work and live.

ABOUT POST FIJI (PTE) LIMITED: Post Fiji's history lies in the first Postal Act passed by the Legislative Assembly of the Fiji Government in December, 1871, which officially established the setting up of a postal department in Fiji, a General Post Office, Post Offices in other parts of Fiji and the appointment of a Chief Postmaster and other Postmasters who may be required to operate these Post Offices. The Cakobau Postal Act prepared and guided those who were to play a pioneering role in the operations and development of postal services in Fiji, until 1989, Fiji's postal operations were a division of a government department called the Department of Posts and Telecommunications. Subsequently, the department became corporatized in 1990 and from this first year of corporatization to thirty June, 1996, Fiji Posts and Telecommunications was restructured three times. On thirty June, 1996, the inevitable separation of Post and Telecommunications was formalized. Two new entities rose in its stead – Post Fiji Ltd and Telecom Fiji Ltd.

Post Fiji Limited commenced as an entity from one July, 1996. It is registered and incorporated under the Companies Act as a private company with a shareholding wholly owned by the Government of Fiji. A Board of Directors, nominated by Government, leads the company. Post Fiji's core activities are messaged communications in letters, and distributing courier and parcel items. It also provides stamps, financial transactions, telegram services and just recently, data processing and mail production services called Smart mail. Post Fiji is responsible for the collection, processing and delivery of letters, parcels and urgent documents to some 69,000 plus letter boxes and some 15,000 residential addresses in Fiji. The Post and Telecommunications decree 1989 gives Post Fiji the sole authority to convey letters from one place to another and to perform all the incidental services of accepting, receiving, collecting and delivering letters. In all other products and services, Post Fiji operates in competitive markets.

POST FIJI STAMP ISSUE APPROACH: Fiji offers exceptionally high-quality stamps and maintains a consistent, conservative stamp issue strategy. We make sure to create well-balanced stamp issues that cover flora, wildlife, historical, cultural, and international events that are pertinent to Fiji. We release four to five issues annually. Aside from the aforementioned, we do take into account the specific preferences of our esteemed clients by producing an adequate number of stamps annually, with face values that are neither excessively high nor low, portraying subjects and themes that are pertinent and exclusive to Fiji, avoiding gimmicky, imperforate specimens, and other unethical practices, and offering genuine and high-quality stamps.

PLAN OF THIS EXHIBIT:

Sheet – 1: Title page
Sheet – 2 to 5: Year of Tiger 2022
Sheet – 6 to 7: Girit Day 2022
Sheet – 8: World Post Day 2022
