Stamps of Tunisia
Roots, World, and Future

This stamp series highlights the cultural, environmental, and social richness of Tunisia through a variety of themes celebrating national heritage, traditions, nature, and major universal causes. It reflects the commitment of Tunisian Post to raising public awareness while promoting local creativity. The last four stamps in the collection hold a special place : they were designed by children as part of the Philakids program, an initiative aimed at encouraging young people's artistic expression and introducing them to the world of philately. Through their spontaneous and authentic drawings, these young artists bring a touch of innocence, freshness, and hope, adding a deeply human and intergenerational dimension to the collection.
