DANGEROUS GOODS SEARCH TOOL AND ILLICIT GOODS CONVERGENCE FORUM

Opening remarks

Mr **Abdel Ilah Bousseta**, Director of Postal Operations, UPU International Bureau

UPU and TRACIT illicit pharmaceuticals toolkit

Ms **Suriya Padmanaabhan**, Director of Programs, TRACIT

UPU illicit goods campaign

Mr **Jacob Gholson**, Postal Operations and Safety Expert, UPU International Bureau

UPU Trainpost platform – New courses on illicit goods mitigation

Mr **Sofiene Jouini**, Trainpost platform Administrator, UPU International Bureau

Dangerous Goods Search Tool

Mr **Stéphane Herrmann**, Mail Products and Services Expert, UPU International Bureau

Closing remarks

Mr **Jacob Gholson**, Postal Operations and Safety Expert, UPU International Bureau

UPU and TRACIT illicit pharmaceuticals toolkit

Suriya Prabha Padmanaabhan, Director of Programs
TRANSNATIONAL ALLIANCE TO COMBAT ILLICIT TRADE

About TRACIT

Aggregated approach work across 11
industry sectors, wildlife and human
trafficking

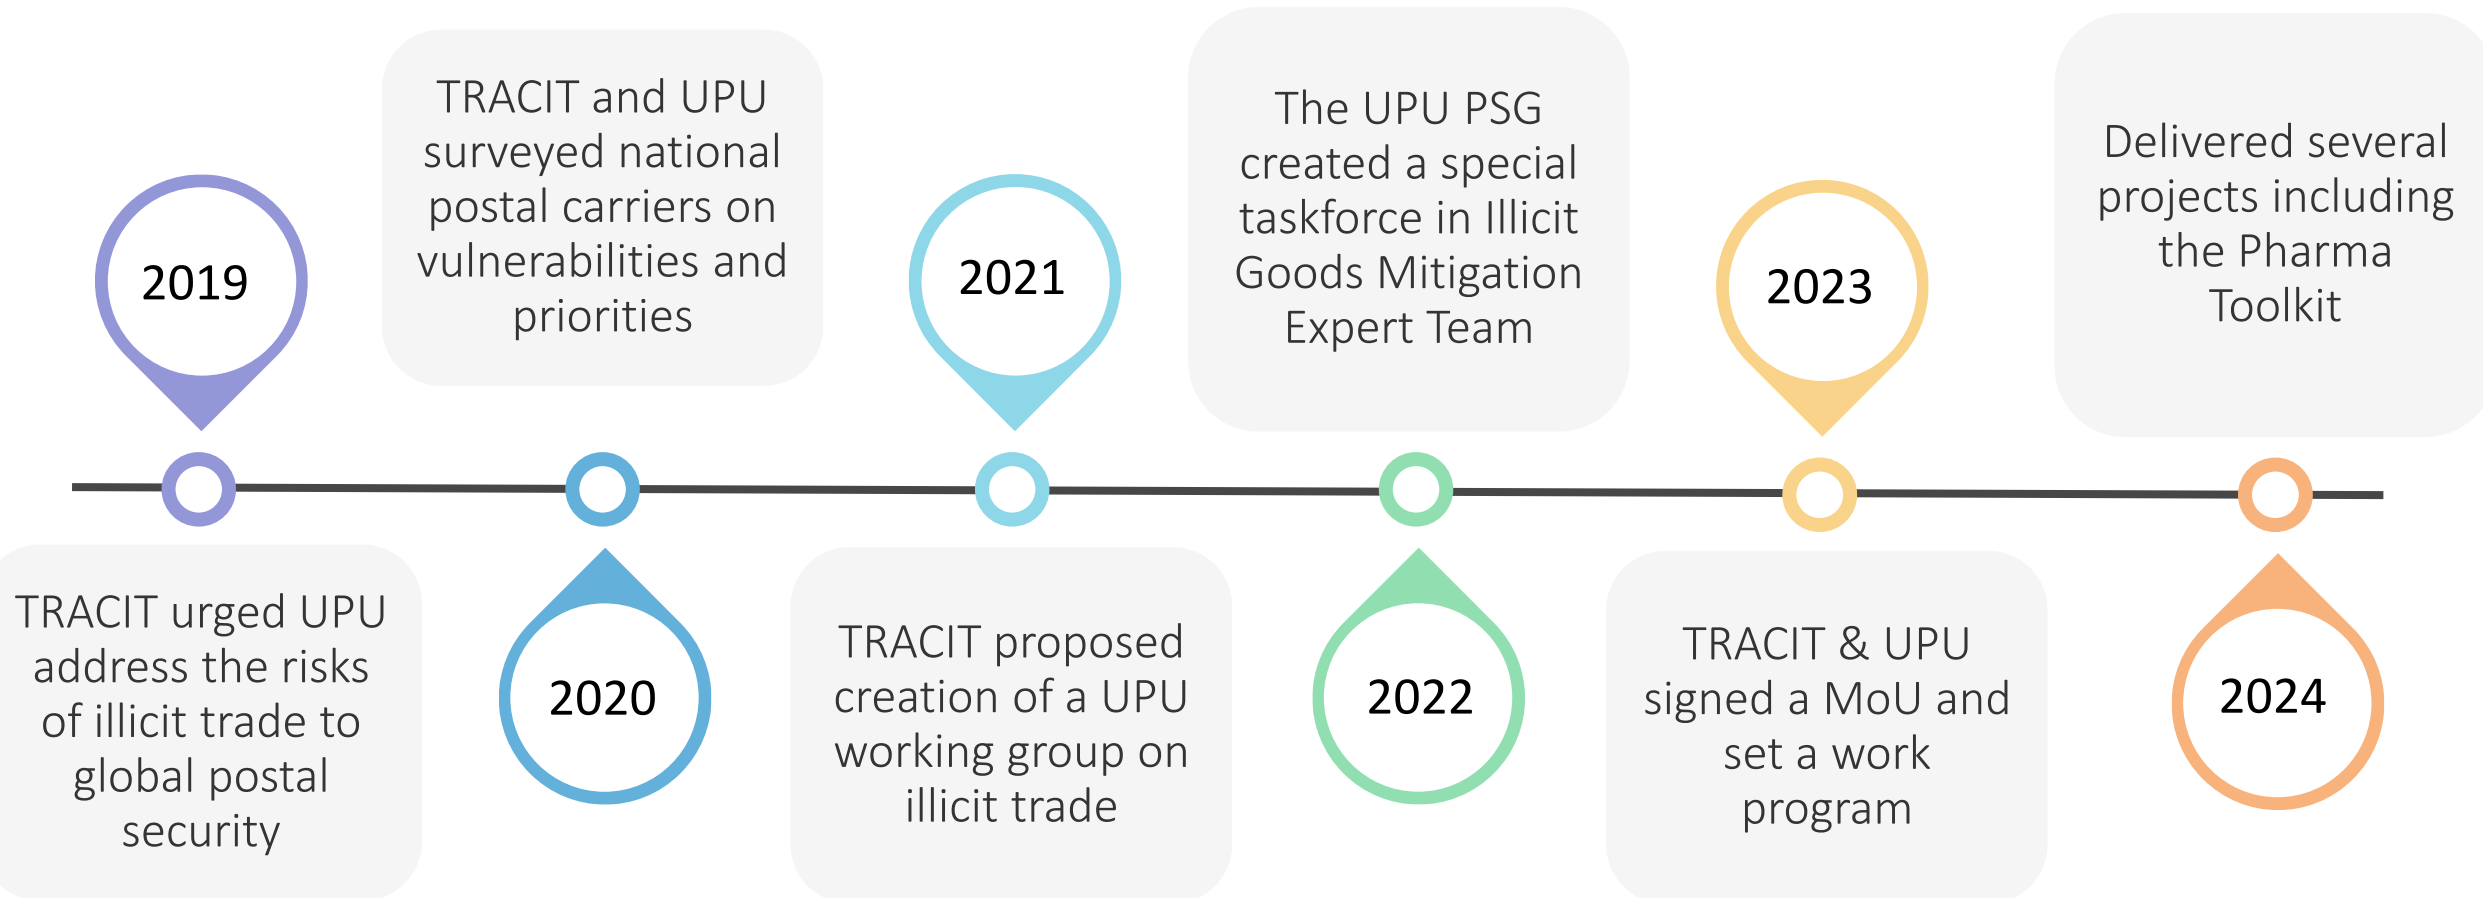

Addressing common vulnerabilities
In the supply chain

Exposing associated crimes

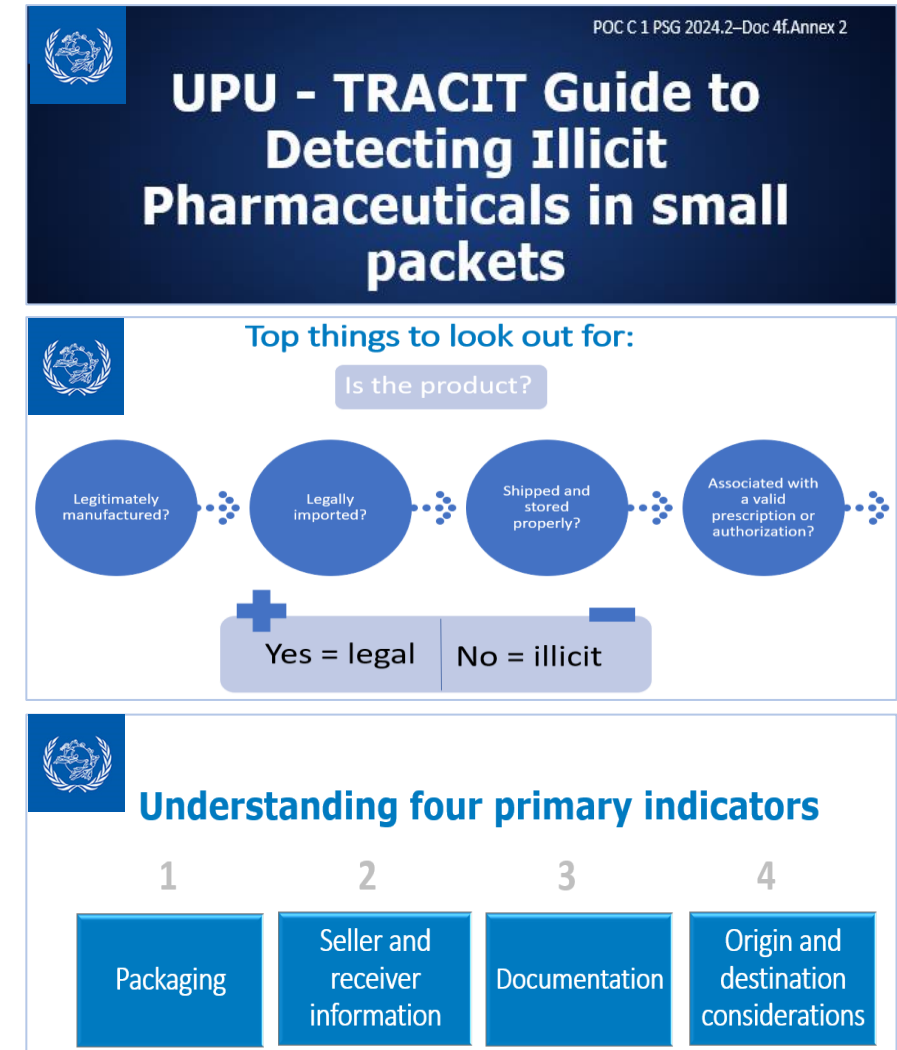

Timeline – TRACIT & UPU engagement

Pharma Toolkit

Sector selected based on UPU-TRACIT survey results: Pharma was #1 among impacted sectors.

- **Production**
 - TRACIT created a guidance document for national posts.
 - TRACIT collected intelligence and data from member companies and other stakeholders: US FDA, INCB, INTERPOL.
- **Products**
 - Detection guide
 - Postmaster briefing
 - Awareness materials

Overview

Introduction
and objectives

Understanding
illicit pharma

Health and
safety risks

Detection
indicators

Recap of key
red flags

Cooperation

Training objectives

Improve designated operators' understanding of illicit pharmaceuticals

Educate designated operators on concealment tactics

Improve designated operators' risk profiling systems

What are illicit pharmaceuticals?

Substandard

Fail to meet quality standards and/or specifications

Unregistered/unlicensed

Have not undergone evaluation/ approval by the regulatory authority

Falsified

Deliberate misrepresentation of composition, identity or source, or tampering

Counterfeit

Infringement of intellectual property rights, fake medicines with harmful ingredients

Theft

Stolen products or embezzlement of pharmaceuticals

Diverted

Approved for sale in one country but sold in another

Tampering

Expired medicines sold after tampering

Health and safety risks to consumers

Therapeutic failure

- No active ingredients
- Undeclared excipients
- Wrong dosage
- Expired or temperature compromised

Toxic

- Harmful chemicals additives
- Presence of poisons or heavy metals

HEAVY METALS

- Mercury
- Aluminium
- Uranium
- Arsenic
- Lead
- Chrome

POISONS

- Rat poison
- Benzopyrenes
- Boric acid
- Antifreeze
- BCPs

CHEMICALS

- Road paint
- Wall paint
- Brick dust
- Floor wax
- Sheet rock
- Paint thinner

NON DECLARED APIs

- Aminotadalafil
- Homosildenafil
- Sildenafil
- Sibutramine
- Haloperidol
- Ciprofloxacin

NON DECLARED EXCIPIENTS

- Dextrose
- Dextrin
- Lactose
- Starch
- Salt
- Saline

Illicit pharmaceuticals lead to loss of confidence in medicines, healthcare providers and health systems

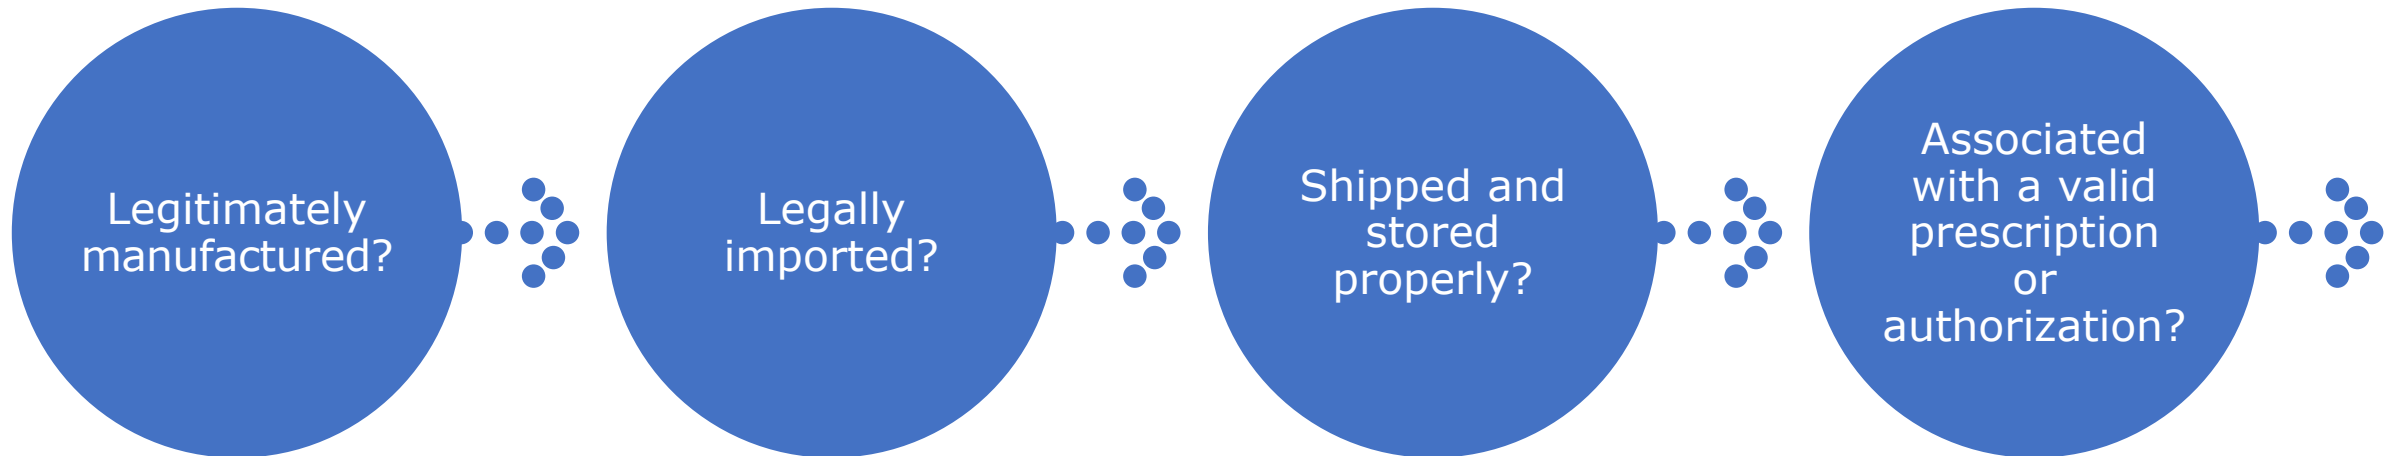

Detection of illicit pharmaceuticals

Key elements to look for

Is the product...

+ Yes = legal | **-** No = illicit

Four primary indicators

Understanding the four primary indicators

What to look for?

1

Packaging

2

**Seller and
recipient
information**

3

Documentation

4

**Origin and
destination
considerations**

Indicator 1 – Packaging

Poor packaging quality

- Visible stains, discoloration, signs of leakage, poor quality material, lumpy packages, excessive tape

Low seal integrity

- Evidence of tampering such as resealing, opened and closed packages

Inaccurate labels

- Spelling errors, grammatical mistakes, errors in manufacturer name or ingredients

Poor logos and branding

- Unable to replicate exact brand name or logo

Embedded in declared items

- Some products can be embedded in packaging with declared items

Operational improvements

- Contact pharmaceutical companies and intellectual property rights holders for additional support in detecting illicit parcels
- X-ray and technological inspections
- Advanced detection systems – chemical composition scanners, contraband-specific detection technologies
- Proper packaging per national regulations – enforcing international packaging requirements
- Training and awareness – adequate personnel training

Indicator 2 – Seller and recipient information

Use of fictitious details

- False names and addresses provided for the sender or recipient – can be non-existent or unable to be linked to individuals or entities

Absence of return address

- Common tactic – parcels without a return address signal immediate risk

Recurrent shipments under different names

- Multiple shipments with the same address and different names, or same name and various addresses

Frequent parcels to a single address or unusual addresses

- Recipients suddenly receiving multiple parcels inconsistent with their usual habits or packages being delivered to suspicious delivery locations, e.g. car parks

Operational improvements

- Identity verification and validation
- Rigorous address verification
- Business verification
- Confirmation by telephone
- Suspicious activity monitoring – develop and implement algorithms to identify patterns of illicit activities
- Cooperation with authorities
- Staff training programmes

Indicator 3 – Documentation

Absence of proper registration

- Regulatory authorities usually require proper registration for the shipment of medicines

Absence of documentation

- Prescriptions, invoices and/or receipts are required to mail medicines

Misdeclaration

- Discrepancies in declarations vis-à-vis physical inspections

Improper customs documentation

- Incomplete, incorrect or suspicious documentation

Alterations to documentation

- Signs of tampering with official documents

Embedded in declared items

- Embedded in packaging with declared items

Product name

- Items listed as powders, samples, prescription drugs, pills or cleaning supplies

Operational improvements

- Verification of valid and appropriate documentation for shipments, including prescription checks
- Implementation of stringent checks to detect misdeclarations – verifying details against Harmonized System codes for Customs
- Multilayered approach with focus on:
 - Inconsistencies in documentation
 - Alterations to documentation
 - Incorrect information

Indicator 4 – Origin and destination considerations

Parcels from high-risk regions

- Focus on regions with high production of illicit pharmaceuticals – e.g. India and China

Parcels frequently sent to a particular city/area

- Common cities and addresses frequently used as destination points

Transhipped parcels

- Multiple labels on the item (overlabelling) and destination cities do not correspond to the country listed

Operational improvements

- Enhanced inspection of parcels from these origins
- Comprehensive verification and inspection processes
- Collaboration with international law enforcement agencies

Patterns in indicators 1 to 4

- Patterns can be any combination of the red flags indicated under each indicator
- The more pronounced the pattern for parcels with the four primary indicators, the greater the chance of the contents being illicit

Cooperation is key

National drug regulatory authorities

National law enforcement agencies: customs and border control, police

Health and safety agencies

Brand owners

Regional cooperation with other Posts to exchange crucial information

Implementation

We need:

- More Posts to use these tools and train their staff.
- Continued support and feedback to improve these toolkits.
- To track progress and impact of these tools.
- More Posts to work with each other and with the private sector.

UPU illicit goods campaign

Presentation by Jacob Gholson
Postal Operations and Safety Expert
UPU International Bureau

Illicit Goods Mitigation Portal

Background

As the threat of illicit goods continues to grow, the Illicit Goods Mitigation Portal is a tool designed as a centralized hub, bringing together and streamlining access to a diverse range of existing campaigns focused on the prevention and mitigation of illicit goods. This platform serves as a valuable resource providing knowledge and easy access to a wide array of tools and materials that can be utilized to strengthen mitigation efforts.

The Campaign has been broken down into four topics related to separate types of illicit goods. Resources and information for each topic can be located on the UPU Illicit Goods Portal.

1. General counterfeits
2. Pharmaceuticals
3. Intellectual Property
4. Illicit Trade in Plants and Wildlife

Topic 1 – General counterfeits

General Counterfeits

These campaigns and tools are designed to raise awareness among adults and teens about the **dangers of counterfeit goods**, and importance of **buying genuine products** over counterfeits.

— — One — —

Campaigns

I Buy Real –

- Collaboration by the UPU, the Business Action to Stop Counterfeiting and Piracy (BASCAP), launched by the International Chamber of Congress (ICC).
- This campaign focuses on four key topics that highlight the serious consequences of buying "fakes".
- Eight flyers to raise awareness among consumers about the importance of purchasing real items instead of counterfeits.

Go for Real –

- Produced by United States Patent and Trademark Office (USPTO) and the US Crime Prevention Council (NCPC).
- Educational initiative for secondary school students on how to make buying decisions as they gain independence.
- Social media toolkit to help spread awareness.
- Three videos starring McGruff the Crime Dog focusing on the consequences of purchasing counterfeit goods.

I Buy Real

FAKES COST MORE

FAKES COST LIVES!

Counterfeit medicines, brake pads, and even toys could cost the highest price of all—your life or the life of someone you love. Fake versions of these products and many more come with dangerous risks to your health, your safety, and even your life.

FAKES COST MORE **I BUY REAL!**

Governments and law enforcement agencies worldwide work hard to stop counterfeiters from producing and selling fakes and pirated products. It's up to you to put the fakers out of business. Stop buying counterfeit products.

BUY REAL. Because fake products have real costs.

BASCAP **ICC**

FAKES COST MORE

FAKES CUT JOBS!

Counterfeit products drain your community's economic lifeblood by robbing legitimate manufacturers and retailers of sales and reducing the need for suppliers, shippers and other manufacturing support. Lower sales results in job cuts—maybe even yours.

FAKES COST MORE **I BUY REAL!**

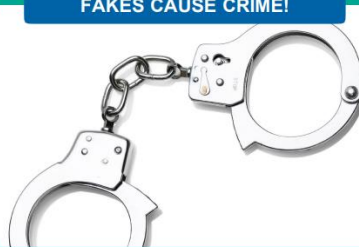

Governments and law enforcement agencies worldwide work hard to stop counterfeiters from producing and selling fakes and pirated products. It's up to you to put the fakers out of business. Stop buying counterfeit products.

BUY REAL. Because fake products have real costs.

BASCAP **ICC**

FAKES COST MORE

FAKES CAUSE CRIME!

When you buy counterfeit products or pirated music, films or software your money is funding organized crime around the world and helping to create a low risk, high profit alternative to drug trafficking and other illegal businesses. Fakers are criminals costing you and your community money, security, and even safety.

BUY REAL. Because fake products have real costs.

BASCAP **ICC**

FAKES COST MORE

FAKES CRASH COMPUTERS!

Getting the latest computer software for half price or even free sounds too good to be true. And it is. Counterfeit CDs and pirated software downloads can crash your computer, corrupt your hard drive, and destroy all your files and photos. Fake software costs more.

Go for Real

Do you think buying fake products is harmless? Think again.

McGruff the Crime Dog® and the **Go For Real™** campaign are teaming up to expose the dangers of counterfeit pills and other fake goods. This video is geared towards preteens, teens and young adults, shedding light on the serious risks and consequences of purchasing and using counterfeit products.

Watch the video [here](#) to learn more and join us in spreading the word about the importance of choosing real and safe products.

Think Again

You're smart. Buy smart. Go For Real.

McGruff the Crime Dog® is back, teaming up with the **Go For Real™** campaign to take a bite out of counterfeits.

Sales of fake products are not just a risk to your health, they can also fund larger criminal enterprises, including human trafficking and child labor.

Join us in the fight against counterfeits and learn how your choices can make a real difference.

Watch the video [here](#).

This video, specifically geared towards teens, dives into the real consequences of buying fake electronics and other counterfeit products.

Watch the video [here](#) to learn more about the dangers and why it's important to choose genuine and safe products.

Topic 2 – Pharmaceuticals

Educators –

This campaign works with the “Go for Real” campaign, providing materials for educators that are designed to empower young people to “think again” before buying and/or taking pills from someone other than a licensed provider.

Designate operators and other partners –

The UPU partnered with Transnational Alliance to Combat Illicit Trade (TRACIT) to produce a guide to detecting illicit pharmaceuticals in small packets. This has become a good resource for postal operators.

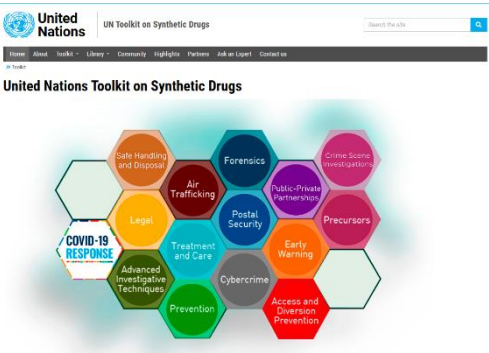

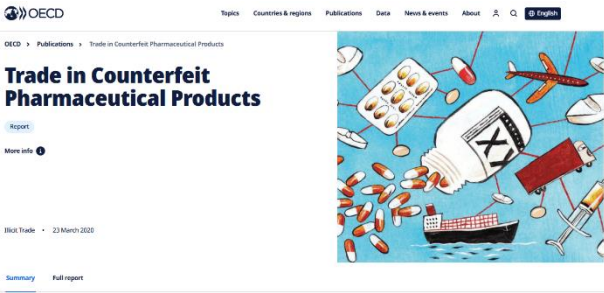

Fake Pharmaceuticals

These materials aim to help communities, including teachers and parents, educate about the serious **dangers of fake pharmaceuticals**.

Pharmaceuticals: Outreach tools

Trade in Counterfeit Pharmaceutical Products (OECD)

United Nations Toolkit on Synthetic Drugs

Mapping the Impact of Illicit Trade on the Sustainable Development Goals - Pharmaceuticals

Practical Guidance for the Postal and Express Courier on Prevention and Interdiction of Non-Medical Synthetic Opioids and Fentanyl

Global Rapid Interdiction of Dangerous Substances

Topic 3 – Intellectual Property

The Intellectual Property (IP) campaign, Building Respect for Intellectual Property, is designed to ensure creators and innovators are recognized, industries flourish and communities thrive. The campaign strives to bring awareness regarding the value of IP, the risks of infringement, and to promote ethical use.

The UPU has also partnered with World Intellectual Property Organization (WIPO) to provide outreach tools for the campaign through resources available on their website.

Building Respect for Intellectual Property

Guide

Guide to brand protection for small and medium-sized enterprises

The Center for Anti-Counterfeiting and Product Protection (A-CAPP) at Michigan State University offers a comprehensive guide to brand protection for small and medium-sized enterprises (SMEs).

This resource is designed to help SMEs safeguard their brands against counterfeiting, piracy and other IP-related threats. It provides practical tools, insights, and strategies for:

- Identifying potential vulnerabilities in brand protection.
- Building robust anti-counterfeiting measures.
- Navigating legal and technological solutions to protect your business.

Explore the guide [here](#) to secure yourself with the knowledge to defend brand identity, reputation and innovation.

Educational readings and toolkits

Here, WIPO presents **Honmono**, a manga (Japanese comic) by Emiko Iwasaki that highlights the dangers of counterfeit products. This engaging narrative, developed through the Real Manga Competition in Japan, aims to raise awareness about the health and safety risks associated with counterfeit goods.

To reach a global audience, **Honmono** has been translated into multiple languages, including **Japanese**, the six official UN languages (**Arabic, Chinese, English, French, Russian and Spanish**), as well as various **Southeast Asian languages**.

All language versions can be accessed and downloaded [here](#).

By illustrating the real-world consequences of purchasing fake items, **Honmono** underscores the importance of respecting intellectual property rights and supporting genuine products.

Discover WIPO's IP challenge game

The IP Challenge, hosted by the World Intellectual Property Organization (WIPO), is an interactive game that makes learning about intellectual property fun and engaging. Through real-life scenarios, players explore how IP rights like copyrights, trademarks and patents, support creativity and innovation.

Test your knowledge with this challenge, and uncover the importance of respecting IP that values and protects creators' rights.

Start the game [here](#) and become an IP champion.

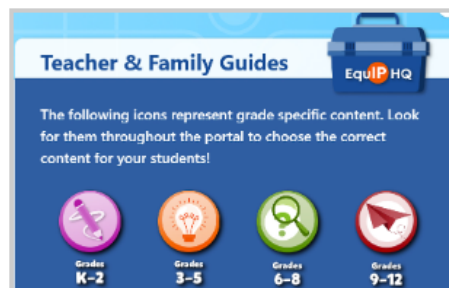

Image credit: USPTO

EquipHQ, developed by the United States Patent and Trademark Office (USPTO), is an educational platform designed to enhance understanding of IP among students, educators and families.

The platform offers interactive games, activities and videos that explore the significance of IP in fostering innovation and creativity.

By engaging with EquipHQ, users can learn how to invent, brand and create original works while developing IP awareness and literacy.

Access all activities, resources and videos from [here](#).

World Intellectual Property Organization

Building Respect for IP: Awareness Raising

Building respect for [intellectual property](#) (IP) involves more than just enforcement; we also have to educate, inform and change attitudes. We assist our [member states](#) to design national strategies for building respect for IP and to develop tools for use in awareness raising, in particular among young people.

Respect for Copyright

This module - supported by funds-in-trust provided by the Republic of Korea - consists of five units designed for children aged 10 to 15. It aims to develop a better understanding of creative activity and the links to IP through debate and discussion. Printable version for students [PDF](#) , for teachers [PDF](#) .

Respect for Trademarks

This module - supported by funds-in-trust provided by the Japan Patent Office - offers three units for young people aged 14 to 19. It focuses on the role of trademarks in modern society and the creativity which goes into the development of brands. Printable version for students [PDF](#) , for teachers [PDF](#) .

[IP and Citizen Journalism - Senegal](#) is an IP awareness-raising project for school students, designed and implemented by the WIPO [Building Respect for IP Division](#) (BRIP) with the generous support of the Republic of Korea's Ministry of Culture, Sports and Tourism (MCST).

Topic 4 – Illicit Trade in Plants and Wildlife

Four

Illicit Trade in Plants and Wildlife

These resources focus on raising awareness of the **dangers of illicit trade** in plants and wildlife and promoting compliance with international standards.

Overview

The global trade of plants and wildlife is vital for economic development but also poses significant risks to biodiversity, ecosystems and food security. The illicit trade in these goods, including unregulated e-commerce transactions, facilitates the spread of harmful pests species, disrupts ecosystems and undermines conservation efforts.

The resources presented in this campaign focus on raising awareness of the dangers of illicit trade in plants and wildlife and promoting compliance with international standards. With the rise of e-commerce, regulating the movement of these goods has become more complex, often bypassing essential checks.

IP Connected Crimes

A Double Homicide, the Chinese Mafia and Counterfeiting!

Paolo Beconcini

Head of China IP Team at Squire Patton Boggs/Lecturer in Law at USC Gould School of Law

April 17, 2025

Lessons to Keep in Mind

The assassination of Zhang D. underscores several critical truths:

- Counterfeiters are not isolated actors—they are embedded in larger transnational criminal networks.
- Organizations like the Chinese mafia rely on counterfeiting to fund other illicit enterprises, including human trafficking and money laundering.
- Chinese counterfeiters operate globally, with the ability to evade tariffs, enforcement actions, and legal boundaries through well-established international networks.
- **Most importantly, counterfeiting is not a victimless crime.** It fuels organized crime, exploits vulnerable populations, and undermines legitimate businesses and legal systems.

UPU Trainpost platform – New courses on illicit goods mitigation

Sofiene Jouini
Senior Administrator, Trainpost platform
Expert in digital learning solutions

Importance of postal security courses on Trainpost platform

- ❖ Statistical evidence highlighting the **growing emphasis** placed by postal operators on security training in recent years
- ❖ Postal security is the training field with the **highest number of enrolments**
- ❖ Security certification (advanced) and dangerous goods are the **most popular courses** on the platform over the last three years
- ❖ Among 95 courses, postal security courses have:
 - highest number of **enrolled** users
 - highest number of **awarded** certificates
 - highest number of **participating** countries

Top ranking enrolments (2022–2025) over 95 courses

Rank	Course name	Number of enrolled users	Number of countries	Number of regions	Number of active learners	Number of certificates
1	Security certification advanced	851	137	6	814	463
2	Dangerous goods and lithium batteries (old)	814	100	6	770	416
3	New approach to quality of service	608	117	6	537	95

Percentage of enrollments

- Postal security
- Postal operations
- Postal technologies
- Quality
- Miscellaneous
- Postal products
- Postal reform and regulation
- Management techniques

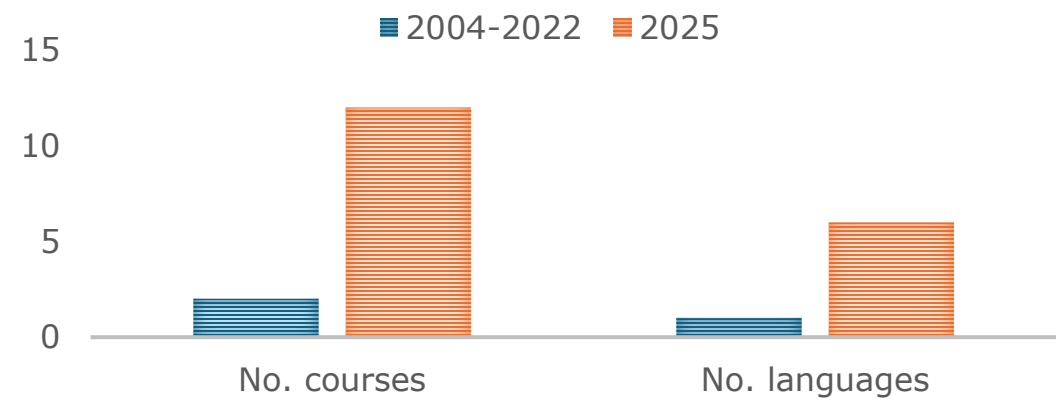

Evolution of postal security courses on Trainpost platform

- Significant growth in the number of e-learning courses developed in the field of postal security
- Development of **high-quality, engaging** and **multilingual** e-learning courses

Strategy for promoting security courses using the Trainpost platform

1 Local facilitators

84 qualified local facilitators: A network of trained local facilitators representing their respective postal operators plays a key role in promoting participation.

We share with them all important updates regarding new courses, and they pass this information along.

- ★ Announce internally the launch of new courses
- ★ Form groups to follow online courses according to their specialties and role at the Post
- ★ Share training initiative information with the platform administrators

No.	Region	Number of tutors
1	Local tutors from Africa	42
2	Local tutors from Arab countries	14
3	Local tutors from Caribbean	28
TOTAL		84

Strategy for promoting security courses using the Trainpost platform

2 Communication tools

Course announcements:

- Trainpost learners community
- Newly launched courses

Reminder plugin: Improve completion rates by automatically sending reminder e-mails to learners who have paused or stopped their progress

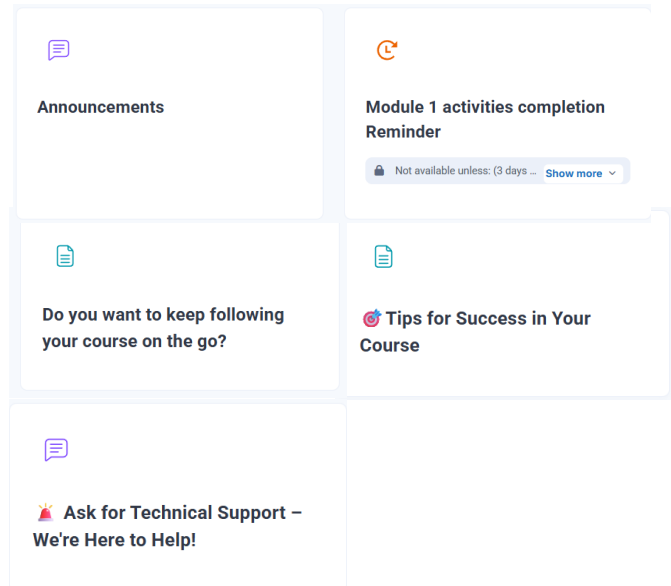

Tips for success in your course

Support forums: Includes a default forum titled *"Ask for technical support – We're here to help!"* to assist users and address technical issues promptly

Matrix platform (in progress): A new communication platform being introduced to replace **WhatsApp** groups; platform supports multimedia messaging, including text, voice and video

Strategy for promoting security courses using the Trainpost platform

3 Enrolment page

- General aims
- Target audience
- Course duration
- Skill level
- Course reviews
- Course modules and assessments
- Certificate of completion
- Other related courses
- A short introductory YouTube video

The screenshot shows the UPU TrainPost platform interface. The top navigation bar includes the UPU logo, 'Training fields', 'Home', and 'TrainPost Mobile app'. A search bar is on the right. The main content area features a course card for 'Basic S58.S59' with a category of 'English' and a review rating of 5.0 (11). The course card includes a video player showing a thumbnail with the text 'DEVELOPMENT OF UPU SECURITY STANDARDS'. To the right of the video player, a sidebar lists course details: 'FREE', 'Enrol Now', 'Started 01 Feb 2025', 'Lessons 9', 'Language English (en)', 'Duration 4 hours', and 'Skill Level Intermediate'. Below the course card, there are two tabs: 'Course Content' and 'Reviews'. The 'Course Content' tab is active, showing a list of modules: 'General Aims', 'Target population', 'Module 1: S58 - Postal Security Standards - General Security Measures', 'Module 2: S59 - Postal Security Standards - Office of Exchange and International Airmail Security', 'Feedback', 'Final test', 'End of course questionnaire', and 'Certificate of completion'. The 'Reviews' tab is also visible, showing a 5-star rating and a list of reviews from users like 'Rakietou BAWA' and 'Mohammed Ahmed Coatwala'.

Flexibility to encourage and motivate participation

- ❖ **Continuous enrolment:** Courses are open from February to December each year.
- ❖ **Multilingual enrolment:** Learners can enrol in the same course in more than one language – ideal for bilingual participants.
- ❖ **Group enrolment:** Bulk enrolment is possible using a list of e-mail addresses.
- ❖ **Flexible progression:** Learners who fail progress tests can request additional attempts and unlock remaining modules.
- ❖ **Trainpost mobile app:** Supports learning on the go and even offline access to course materials.

Security courses – Roles to monitor participation

Non-editing local tutor	<ul style="list-style-type: none">– Granted upon request by local tutors or postal operators– Enables local tutors, through local course groups, to closely monitor participation from their country
Non-editing tutor	<ul style="list-style-type: none">– Assigned to UPU security programme managers– Allows tracking of learner progress across the course
Tutor	<ul style="list-style-type: none">– Assigned to scripting providers– Grants the ability to integrate course packages, activities and resources

Options for benefiting from security e-learning courses

1 Self-paced individual learning

Learners access the online modules at their convenience, progressing at their own pace.

2 In-person group training (**blended learning**)

Postal operators can organize facilitated group sessions using the e-learning content as a foundation. This approach encourages collaborative learning, local discussion and practical application through workshops or classroom activities.

3 Pre-workshop preparation for **UPU-led postal security workshops**

Online security courses serve as essential preparatory material for **UPU regional** or **global workshops** on postal security. Completing e-learning modules beforehand ensures participants arrive with foundational knowledge, enabling more effective face-to-face training and deeper engagement.

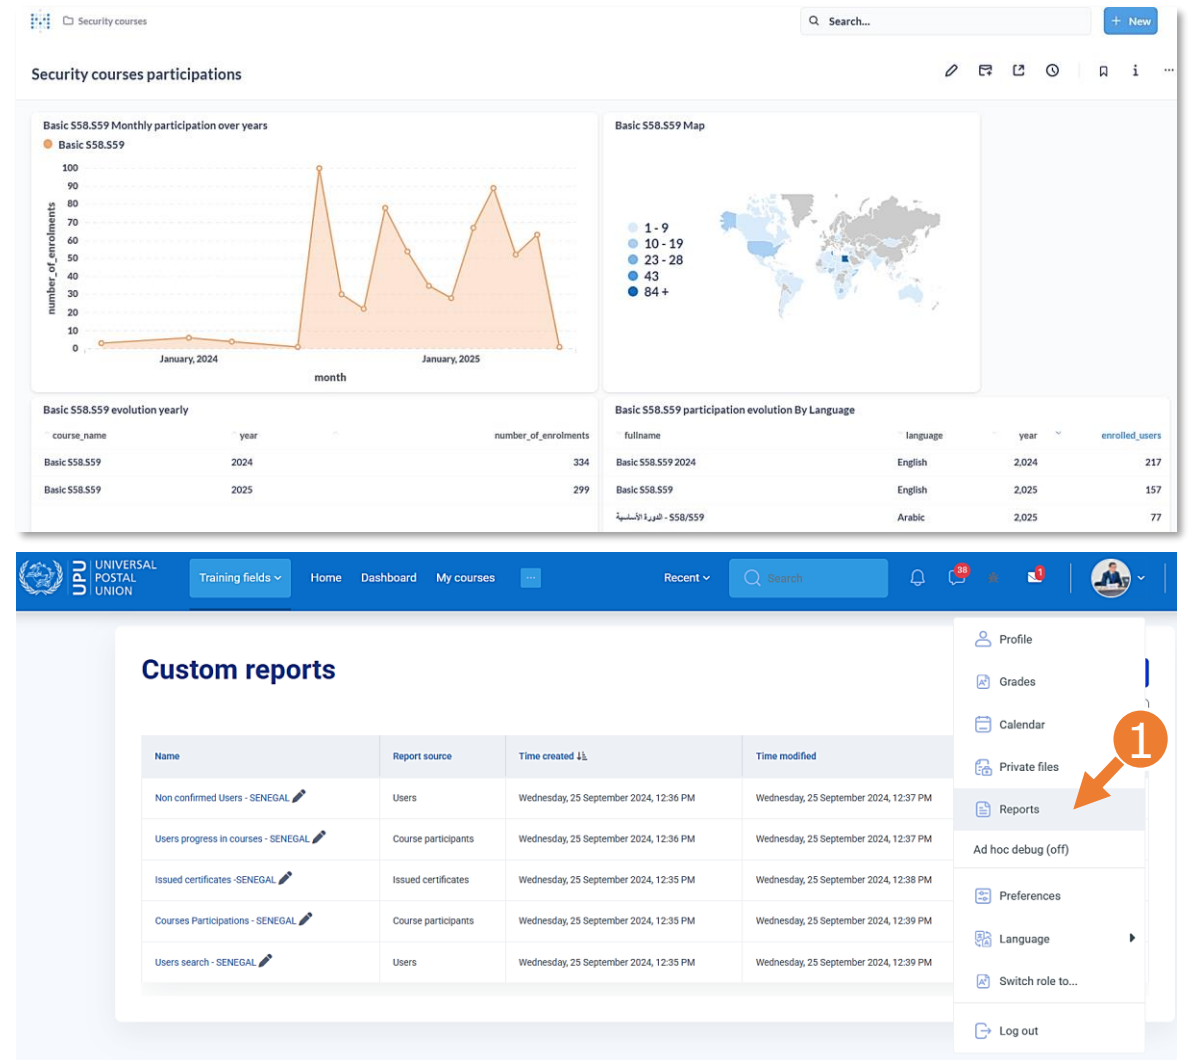

Dashboards and reporting tools (for UPU International Bureau experts and programme managers)

❖ **IB dashboard:** Customized real-time data visualization and tracking

❖ **Custom reporting:** Tailored reports to monitor participation, completion and engagement levels

- ▶ Five custom reports are provided to each postal operator
- ▶ Custom reports for security programme manager and IB experts

Trainpost mobile app QR code

Dangerous Goods Search Tool

Presentation by Stéphane Herrmann
Mail Products and Services Expert
UPU International Bureau

Definition

DGST (Dangerous Goods Search Tool) is an application developed by the Universal Postal Union to enable designated operators and carriers to **detect, identify and intercept dangerous goods** at any point – but as early as possible – in the supply chain.

The development of DGST has been funded by the US Tied Funds provided under the requirements of Article 29-10 of the UPU Convention.

Business Drivers

Early detection of dangerous goods allows:

- Improve safety and security
- Prevention of criminal activities
- Legal and regulatory compliance
- Save transportation and handling cost
- Monitor trends in dangerous goods appearances

Scope

Prediction

Provide an **API** that can calculate the **probability of an International mail item being dangerous.**

Analytics: reporting

Provide super users with **analytical/aggregated reports/dashboards**

Analytics: Search/Query

Provide super users with **click and type-based search capability** to drill down at different levels within the data

Prediction of Dangerous Goods

DGST calculates the probability of being dangerous for an international mail item using **machine learning/AI algorithms** based on postal EDI messages (ITMATT, EMSEVT...).

Example of information that can be used:

EMSEVT → the locations where the items are processed

→ the reason code for sending items at customs, or for canceling import/export

ITMATT → sender/recipient name and address, description of items...

Prediction of Dangerous Goods

- The system calculates the probability **near-real time** and provides it through an API
- The **machine learning model is re-trained regularly** (e.g. every 3 months) in order to improve its predictions
- The **procedure to be followed** is decided by each designated operator on the basis of the dangerous goods prediction score.
- **Data privacy:** DGST only uses data for which the designated operators have authorized its use.

Analytics on Historical Data

Reporting: The system will provide aggregated reports and dashboards

- Actual vs predicted dangerous goods
- Customs/security retention reasons
- Top 10 DG exporters and importers

...

Query/Search: The system will provide capability to search for dangerous goods by a combination of attributes (Search Query Tool)

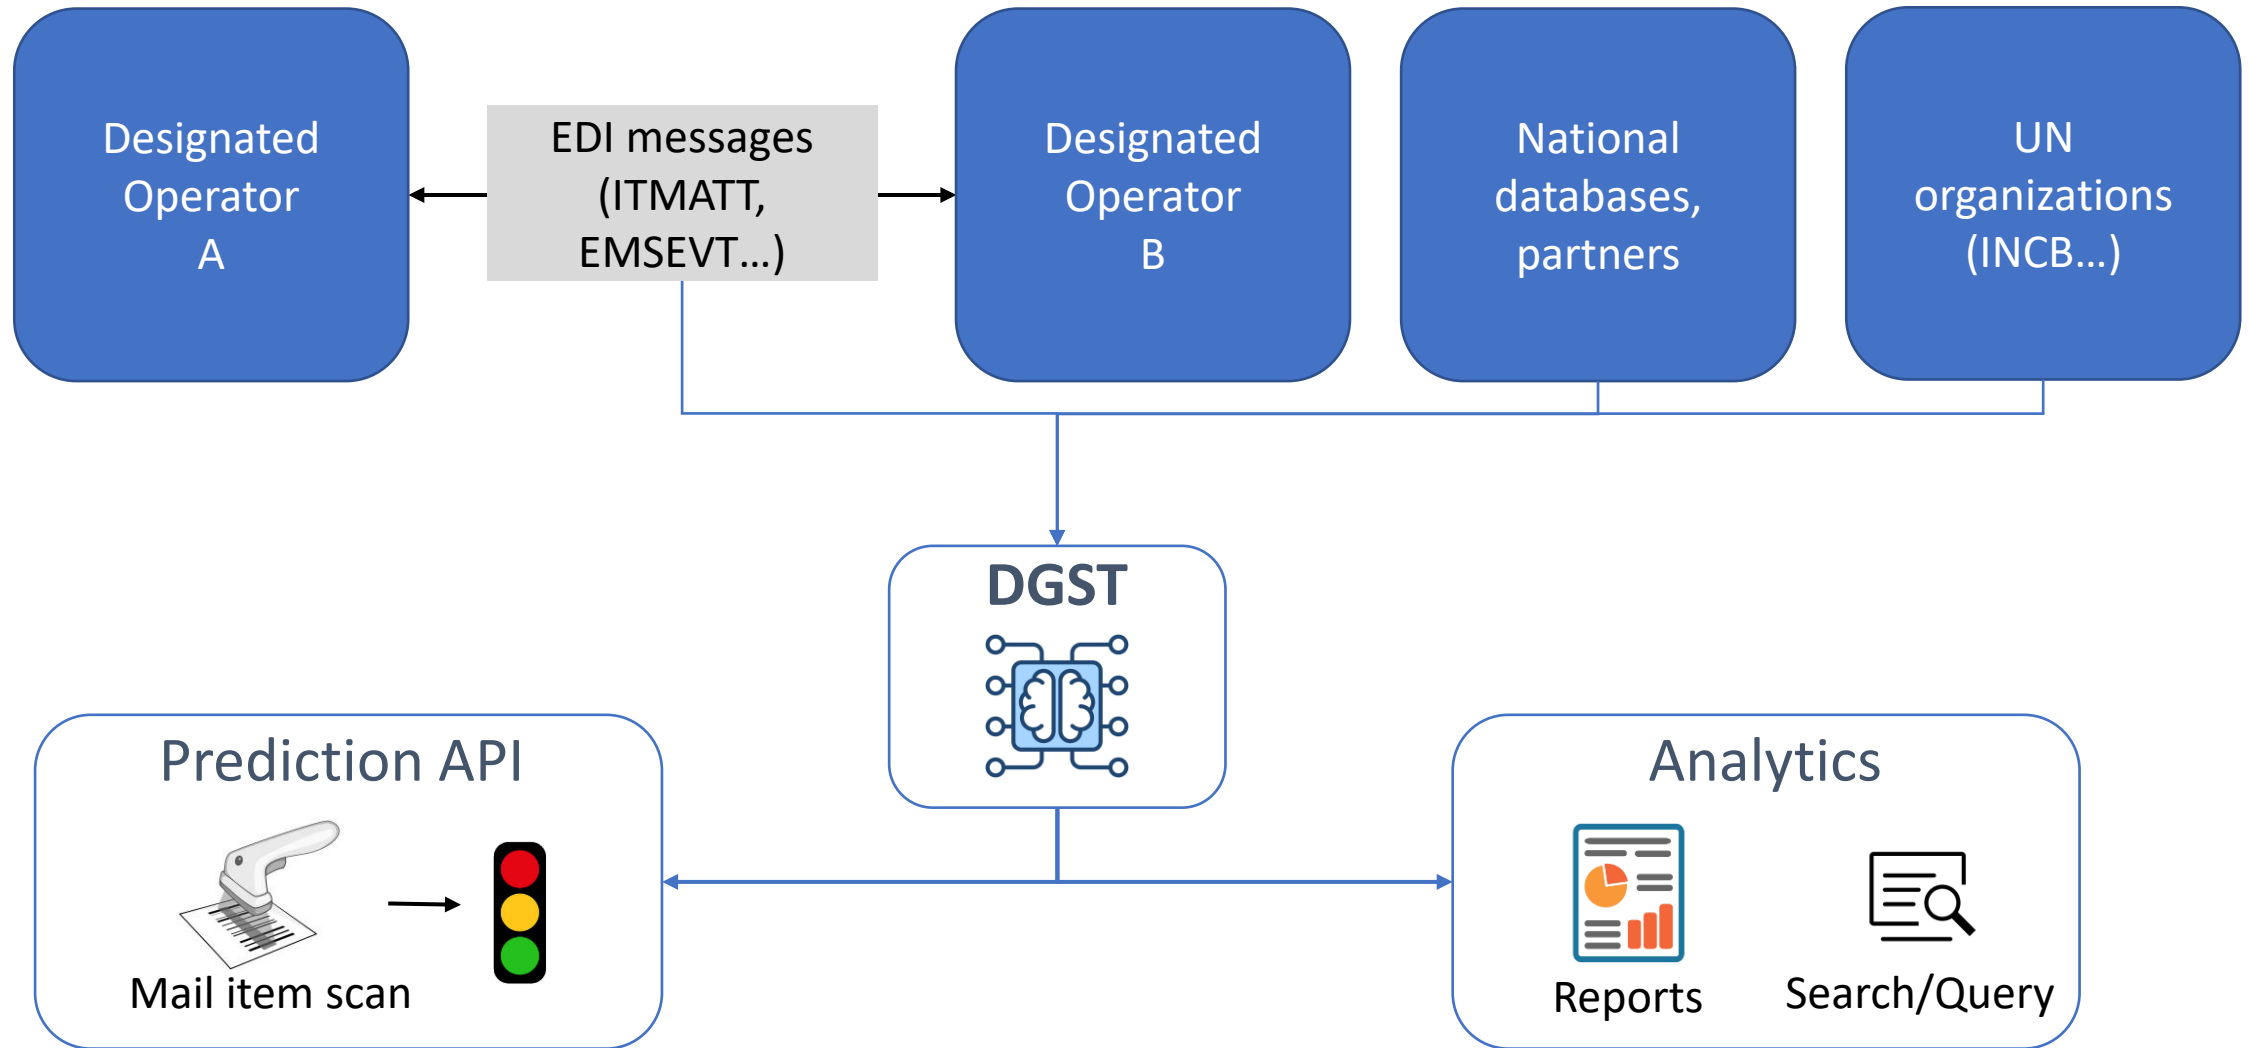

Integration

In a next step, the system will **integrate with external systems** in order to improve the predictions:

- National databases maintained by designated operators, customs...
- Databases from other UN organizations (INCB - International Narcotics Control Board...)
- Denied parties databases
- Confirmed dangerous goods reported to the Postal Security programme
- ...

Final note: data is key!

- DGST is a machine learning system, built on the big data infrastructure available at the UPU
- Capacity to feed the system with large amount of data is ready
- The machine learning process will become increasingly performant (and DGST will become increasingly “intelligent”) when learning on large data sets
- Posts are therefore **encouraged to authorize access to their data, and in return obtain maximum value from the DGST**

2025 PSG Chairman Award Nominations

#PostalSecurity Champions #PSGaward2024

WHY IS POSTAL SECURITY IMPORTANT?

"Postal security is essential to protect lives and ensure safe operations for staff, transport, and customers. It combines physical security to detect threats and data-driven processes to combat risks, relying on continuous improvement, training, and regular checks."

HOW DO YOU EXPAND POSTAL SECURITY IN YOUR POST, REGION, OR GLOBALLY?

"We partner with national authorities to train staff, conduct regular security checks, and refine procedures based on feedback and incident analysis. High-risk items and countries are flagged, with enhanced measures like drug-sniffing dogs and X-rays for inbound mail. Additionally, we support African and Arab countries through training and hands-on demonstrations of best practices."

Hatem Hussein, Director of Quality,
Egypt Post

- 2025 Application process is now open until 1 July 2025.
- More information and all forms are available [here](#)
- The nomination must demonstrate the intent of the UPU has been reached, resulting in a positive outcome in the field of postal security.
- The submission should allow the judging panel to assess how the nominee has performed as a role model for the industry or how they have demonstrated exceptional leadership qualities within the postal sector.
- Nominations should be prepared electronically and submitted as an e-mail attachment to security@upu.int
