

As a representative of logistic-natives e.V., I was already a member before the Consultative Committee was opened to wider sector players. I am therefore very familiar with the Committee and its members.

As an association, we are an international network, neutral and independent. We bring in-depth expertise in logistics across the entire value chain of modern commerce (e-commerce). We are happy to contribute this expertise in an even more targeted manner through the MC and look forward to working with all members equally and giving the designated operators new opportunities that will make them competitive in the future.

About the logistic-natives e.V.

„The logistic-natives e.V. is an international logistics infrastructure network for modern commerce, whose members are predominantly German SMEs. As an association, logistic-natives e.V actively represents the economic and legal interests of over 30,000 companies in the industry. Its primary aim is to empower its members to benefit from increasingly digitalized business processes and to apply digital communications media in delivery workflows for digital commerce to optimize delivery, sustainability, life cycle management, circular logistics and returns management. As a rich source of practical expertise, the network is the first point of contact for representatives from politics, administration, business and other institutions wishing to create national and international solutions for tomorrow’s commerce. The logistics-natives e.V. sees itself as a cross-sectional association for various branches of industries, making it relevant to all stakeholders involved in commerce.“
